PRESS RELEASE FOR IMMEDIATE RELEASE:

LOCAL PRIMARY CARE GROUP GETS CASUAL FOR A CAUSE

Tenth Annual National Denim Day®

October, 2005 - Every three minutes, another person will be diagnosed with breast cancer. In 2005, an estimated 211,240 men and women will be diagnosed with invasive breast cancer. On Friday, October 7th, the employees and physicians at TriValley Primary Care's six Bux-Mont offices donned their denim for Lee National Denim Day, the world's largest single-day fundraiser for breast cancer research, education, screening and treatment. To support this cause, employees wore their denim to work in exchange for a \$5 donation to the Susan G. Komen Breast Cancer Foundation. TriValley matched the employee donations for a total contribution over \$1,100.00! TriValley Primary Care is committed to playing a positive role in the communities it serves, and is pleased to take part in the battle against this invasive disease.

Because every woman is at risk for breast cancer, TriValley urges women to see your medical professional to discuss your risk for breast cancer and breast health needs, follow regular screening guidelines, learn how to do a breast self-exam, and get annual mammograms if over the age of 40. Education and preventative screenings could make a difference.

TriValley Primary Care is the premier primary care group practice with seven offices serving southeast Pennsylvania's Bux-Mont region. TriValley has 29 primary care physicians and 4 nurse practitioners committed to providing quality medical care in the community.
